**GARRETT LEIGHT CALIFORNIA OPTICAL**

Our brand was born and built in Venice. Without it—its people, its places, its spirit—there is no GLCO; it influences everything we do. So for our Fall 2018 Collection we're returning to our roots, creating and reinventing California classics for a new generation.

Experimenting with new acetates, ultrathin metal constructions and semi-flat lenses, we've reworked timeless silhouettes and color combinations through a late 80s and early 90s filter. In optical there's the metal Robson and its angled take on a P3 shape. From sun we're excited about the acetate Horizon and Pier with enclosed metal eye wire and filigree detailing. There's lots of new colors for our glass and CR-39 lenses, including the Crescent and Seville's extreme half gradients and the Steiner's pop pure glass tones. We've also brought back some of our old school favorites in new colors and sizes, like the Louella and Wellesley—styles all named after the streets of our Venice hometown. It's where we come from and who we are, and it continues to inspire us every day.
